 - **DO NOT send the one-time \$1 USDC payment**
8. RPC: <https://www.alchemy.com/rpc-api>
9. Jupiter: <https://developers.jup.ag/docs/get-started>

tips

1. ask clarifying questions about the spec so you get it right
2. quality and accuracy is very important. test all the major flows and fix obvious bugs.
3. power the app with real data, pull to refresh MUST work
4. test trading with devnet. once devnet works, switch to mainnet.
5. all services have free tier

deadline

by July 5

ask for extension upfront if your time is constrained

once you are done. please share the **appetize live preview**. i'll review and get back to you.
